

- ***Group Calendar and Scheduling***

Share your calendar with co-workers, view other's calendars in one click, and schedule meetings with automatic invitations, confirmations and reminders. Zimbra provides the tools for company-wide calendars, delegated access, and more.

- ***Centralizes Contacts and Groups***

With Zimbra, contacts and mailing lists can be shared, viewed and managed by as many people as you choose. By using and updating the same list(s), keeping data up to date is easy and accurate.

- ***Anywhere Access***

Zimbra works anywhere you can get internet access and on any mobile device. No extra hardware or complexity required.

- ***Works on Any Machine***

With a feature set that surpasses systems like Exchange® inside of a browser, Zimbra works on any machine – PC, Apple and Linux. Choose the machine best suited for your work, not just your email.

- ***Reduces Spam***

Zimbra's integrated anti-spam and anti-virus, coupled with Highland's advanced anti-spam techniques like greylisting, make time wasted on spam a thing of the past. Our clients typically see a 80-95% reduction in spam volume, many receiving less than one spam email per day.

- ***High Reliability and Local Support***

Zimbra has well over 99% uptime. As the premier Zimbra provider in Chicago, Highland provides expert, local support. We don't employ a call center. Our team works directly with you, without the "normal" headache and hassle of technical support.

- ***Data Security and Retention***

With Zimbra, your data is secure from intrusion via the internet. In addition, it adds an extra layer of protection from fire, disaster or physical theft. Plus, if you accidentally delete information you need—from a single email to an entire account—we can restore it for up to 30 days.

- ***Ease of Administration***

Zimbra allows you to change accounts, users and passwords on the fly with no limits or restrictions, saving you time, hassle and money. Zimbra is fully under your control.

- ***No Hardware Costs***

With Zimbra, there is no need to purchase a server, so startup costs drop from five figures to three, and there is no hardware to support.

- ***End User Flexibility***

Zimbra offers full syncing capabilities to Outlook and Mail/iCal in addition to its own interface. With Zimbra, your users can choose. So you can take your pick, while still benefiting from Zimbra's features.
